

Why Should You Drink Ionized Alkaline Water?

Acidity from stress, reverse osmosis water & acidic foods can lead to:

Acid Reflux * High Blood Pressure * Weight Gain * Cancer

High Cholesterol * Diabetes * Dyspepsia * Heartburn * Much More

Ionized alkaline water can reverse acidity, address many health issues and is the healthiest water available. Many years of advanced medical and scientific research have produced these high quality machines that are classified as "medical substance providers" by the government of Korea and Japan. LIFE Ionizers™ first filters and then micro-clusters, ionizes and alkalizes tap water so that it is the best alkaline/ionized or Kangen water available. The ionized alkaline drinking water has exceptional hydrating and anti-oxidant qualities...this is due to the fact that it creates micro-cluster water and has an abundance of negative ions created by the ionization process. These negative ions neutralize free radicals which are known to contribute to aging and disease. To learn more about Ionized Alkaline Water, [Click Here](#).
